

These instructions apply to the following models:

M23012R – Red Double Bullseye LED light

M23012Y – Amber Double Bullseye LED light

Installation information:

- Dimensions:
Length is 4", width is 2"
Spacing between mount holes: 3" center to center.
- Wiring:

Wire Color	Function
White	Tail / running light

NOTE: One of the mounting holes serves as the B- (negative / chassis ground) connection to the light. The mounting screw contacts the small ring terminal at the mounting hole when it is tightened down upon mounting of the light. The screw needs to contact the metal chassis of trailer or vehicle.
